Objective

Applying for a position of a Junior Software Testing Specialist

Summary

I'm focused on continuous development in testing, I complete the task on time, easily find a common language with the team, willingly share my experience. I have a great interest in learning new things. I quickly understand new instruments and do not afraid to ask questions if I can't find solutions.

Skills

Testing web applications *(functional testing, exploratory testing, usability testing)*

Testing mobile applications *(functional testing, exploratory testing)*

Testing theory *(types of testing, test design techniques, client-server architecture)*

Creation and update of test documentation *(checklists, tests cases, bug reports, [test result reports](#))*

Software development lifecycle understanding *(Agile, Scrum, Kanban)*

Database Management: [*MySQL*](#)

OS: *Windows, IOS*

API Testing Tools: [*Postman*](#), *SoapUI (on course)*

Webserver: *Apache 2.4 (on course)*

Tools: *Devtools, Pict, Android SDK (on course)*

Version control system: [*GIT*](#) *(basic)*

Markup languages: [*HTML/CSS*](#) *(basic), XML*

Test Management Systems: *TestRail (on course)*

Automation Testing Tools: *Katalon Recorder (on course)*

Wiki system: *Confluence (on course)*

Bug Tracking Systems: *Jira (on course)*

English Proficiency: *Pre-Intermediate*

Other: *JSON*

Education

2021 – Trainee, Educational Center for Programming and High Tech (IT-Academy)

Course: *Functional testing of Software*

PDF

Certificate.pdf

2012 – 2015 Gomel College-Branch of the "Belarusian State University of Transport"

Specialization: *electromechanical technician*

Work experience

IT-Academy (Mar-2021–Jun-2021)
Tester, Testing team leader (Trainee)
